

# **QUICK RESUME BUILDER**

## **ABSTRACT**

The Resume Builder is a web-based application that enables users to create professional resumes quickly and efficiently. It provides an intuitive interface where individuals can enter their personal details, education, work experience, skills, and other essential information. The system then formats this data into well-structured resume templates.

The frontend is built using React.js and Tailwind CSS for styling, ensuring a responsive and visually appealing design, while Firebase is used as the backend for authentication, real-time database storage, and cloud functions.

Users can save, edit, and download resumes in formats such as PDF. Key features include real-time resume preview, cloud storage, authentication via Firebase, and customizable templates, making it a powerful and user-friendly tool for job seekers to craft professional resumes effortlessly.
